

DES PLC · ADDIS ABABA, ETHIOPIA

CORPORATE TRAINING CATALOGUE

Upskilling the teams who keep Ethiopia's systems running.

In partnership with Infinite Icon Technology, Dubai · ISO 9001:2015 certified quality system

EDITION 2026 · SIX TRAINING TRACKS

Digital Enterprise Solutions PLC · des-plc.com · +251 97 720 1981

Contents

How we design training, the quality system behind it, the six tracks in detail, and how a programme is scoped and run.

01

Our Training Approach

Built around your team, delivered in both languages

02

Quality Assurance

Our partner's ISO 9001:2015 certified management system

03

The Training Tracks

Six tracks plus custom programme development

04

Pathways & Tailoring

Role pathways and sector-specific adaptation

05

Running a Programme

Scoping, delivery, assessment and what you receive

01

Our Training Approach

We do not run a fixed curriculum. Each engagement starts with your team's skill gaps, schedule and goals.

Every programme is built around you.

Technology only transforms an organisation when the people inside it can own it. That is why every deployment DES delivers comes with a training track, and why no two curricula are identical.

Designed per engagement

We start from your skill gaps, schedule and goals, then design around them rather than fitting you to a catalogue.

Delivered alongside build

Training runs during the build and train stages of the engagement, so staff are ready at go-live rather than weeks after it.

Amharic and English

Materials and delivery are bilingual as standard, so comprehension is never the limiting factor on capability.

Your systems, your data

Exercises use your live configuration and, where policy permits, your own operational data.

Trainers based in Ethiopia

Delivery is by DES trainers who are in the country and available for follow-up, not fly-in consultants.

Measured, not assumed

A baseline diagnostic before delivery and assessment afterwards, so capability change is evidenced.

TRAINING IN ACTION

A look inside our training sessions.

Moments from delivery, briefings and delegation sessions run with our partner Infinite Icon Technology.

Program coordination session

Roundtable with delegation partners

Strategic briefing session

Leadership working session

Institutional planning workshop

Team review session

Photography is from live delivery and delegation programmes. Publication consent is confirmed before any image showing a client or delegation is used.

Onsite across Ethiopia, remote where it suits you.

Cohorts are typically 8 to 16 delegates. Larger populations are run in waves so the institution keeps operating while people are trained.

Onsite

Delivered at your premises or a venue in Addis Ababa, with equipment and materials provided.

Remote

Live instructor-led sessions in shorter blocks, suited to regional offices and branch networks.

Blended & delegation

Mixed cohorts, plus hosted delegation and study-visit programmes with our partner.

WHAT MAKES DELIVERY LOCAL

Amharic and English

Materials and delivery are bilingual as standard, so comprehension never limits capability.

Trainers in the country

DES trainers are based in Ethiopia and available for follow-up, not fly-in consultants.

Built for real bandwidth

Remote sessions are designed for intermittent connectivity, with offline materials issued in advance.

Regulatory context

NBE and INSA expectations are reflected in the content, not bolted on afterwards.

Institution-friendly scheduling

Waves are planned around your service hours so counters and branches stay open.

02

Quality Assurance

Programmes are designed and delivered under our partner's ISO 9001:2015 certified quality management system.

Delivered under a certified quality system.

PARTNER QMS
ISO 9001
: 2015
INFINITE ICON

Our global partner, Infinite Icon Technology L.L.C, holds ISO 9001:2015 certification for its quality management system. Joint programmes are scoped, designed, delivered and reviewed under that system, which is why our method is documented and repeatable rather than dependent on which trainer turns up.

STANDARD	ISO 9001:2015 — Quality Management System
CERTIFIED ENTITY	Infinite Icon Technology L.L.C, Dubai, UAE
CERTIFICATE No.	VSQC099-421263839
CERTIFICATION BODY	Veritas System Quality Certificates Issuing LLC
ACCREDITATION	EIAC • CB-QMS-099 • IAF MLA member
INITIAL CERTIFICATE	22 May 2026 • Issue No. 01
SURVEILLANCE DUE	21 May 2027 • three-year cycle

The certificate is held by Infinite Icon Technology L.L.C. DES PLC does not itself hold ISO 9001 certification at the date of this catalogue.

VERITAS

CERTIFICATE

OF REGISTRATION

This is to certify that the Management System of

Infinite Icon Technology L.L.C

Office No 203, Albahar, Al Khabeesi, Deira, Dubai, United Arab Emirates.

has been assessed and registered by Veritas System Quality Certificates as conforming to the requirements of

ISO 9001:2015

Quality Management System

The Quality Management System is applicable to:

- Service Provider of Data Management & Cyber Security Services, IT Infrastructure, Cloud Service & Datacenters Providers, Information Technology Network Services Datacenter Colocation Services.
- Data Classification & Analysis Services, Computer Systems & Communication Equipment Software Design, Internet Content Provider, Education & Training Computer Software, Social Media Applications Development & Management, Marketing Services Via Social Media, Portal, Electronic Chips Programming and Web-Design.

IAF/EA-NACE Code: 33-62.02/62.09/63.11

Certificate No : VSQC099-421263839

Initial Certificate Date : 22-05-2026

Surveillance due date / Expiry date: 21-05-2027

* Note: The validity of this certificate is subject to the successful completion of annual surveillance audit on or before the above-mentioned due date, and a new certificate will be issued. The certification cycle is 3 years from the certification date. If the surveillance audit is not done, then the certificate shall be suspended/cancelled.

Authorised Signatory

Veritas System Quality Certificates Issuing LLC
P.O. Box: 122982, Al Karama, Dubai,
United Arab Emirates.

Issue No: 01

This certificate remains the property of Veritas System Quality Certificates Issuing LLC and must be returned on request. In the issuance of this certificate, Veritas System Quality Certificates Issuing LLC has no liability to any party other than to the client, and then only in accordance with the agreed upon certification agreement.

Validity of this certificate may be confirmed at www.veritasassurance.com, directly through QR code by using any device with correct information, or by email to admin@veritasassurance.com.

www.veritasassurance.com

The certified scope, as worded on the certificate.

Buyers in regulated sectors check scope, not just the badge. This is the registered scope in full, reproduced without paraphrase.

Certificate No. VSQC099-421263839

Held by Infinite Icon Technology L.L.C · IAF / EA-NACE 33-62.02 / 62.09 / 63.11

THE QUALITY MANAGEMENT SYSTEM IS APPLICABLE TO

- Service Provider of Data Management & Cyber Security Services, IT Infrastructure, Cloud Service & Datacenters Providers, Information Technology Network Services Datacenter Colocation Services.
- Data Classification & Analysis Services, Computer Systems & Communication Equipment Software Design, Internet Content Provider, Education & Training Computer Software, Social Media Applications Development & Management, Marketing Services Via Social Media, Portal, Electronic Chips Programming and Web-Design.

What the certified system changes for you.

ISO 9001 is a system standard, not a training accolade. These are the specific controls the certified system puts around a joint programme.

Documented scoping

Every programme starts from a recorded needs analysis and agreed learning objectives, signed off before design begins.

Controlled materials

Course materials are version-controlled and reviewed, so two cohorts six months apart receive equivalent content.

Trainer competence records

Instructor qualification and subject currency are recorded and reviewed rather than assumed.

Measured feedback

Delegate evaluation and outcome data are collected every cohort and fed into the next revision.

Non-conformity handling

When something falls short there is a defined corrective process with an owner and a closure date.

Management review

Programme performance is reviewed at management level on a fixed cycle, with actions tracked.

03

The Training Tracks

Six tracks spanning technical administration, analysis, security, leadership, system adoption and bespoke programmes.

Six tracks at a glance.

01

IT & Systems Administration

Intermediate to Advanced

02

Data Analysis & Reporting

Intermediate

03

Cybersecurity Awareness

Foundation to Intermediate

04

AI & Digital Transformation

Advanced

05

Software & Systems Onboarding

Role-based

06

Custom, by request

Built to your requirement

Every track is re-scoped against your cohort, their starting level and your schedule before delivery.

IT & Systems Administration

Equipping the people who keep servers, networks and core systems running day to day.

AUDIENCE

IT officers, system administrators, technical support staff

LEVEL

Intermediate to Advanced

FORMAT

Onsite in Addis Ababa or at your premises

MODULES

- | | |
|---|---|
| 01 Server and network fundamentals in low-bandwidth environments | 04 Monitoring, logging and fault diagnosis |
| 02 User, access and identity administration | 05 Patching, hardening and change control |
| 03 Backup, restore and continuity procedures | 06 Escalation, documentation and handover discipline |

ON COMPLETION, DELEGATES CAN

- ✓ Administer core systems without vendor dependency
- ✓ Diagnose and resolve routine faults onsite
- ✓ Run backup and restore to a documented standard
- ✓ Maintain change and access records for audit

Delivered against your own environment wherever possible, using a sandbox rather than a generic lab.

Data Analysis & Reporting

Turning the operational data an institution already collects into decisions leadership can act on.

AUDIENCE

Analysts, planning officers, MIS and reporting teams

LEVEL

Intermediate

FORMAT

Onsite · Amharic and English

MODULES

- | | |
|--|---|
| 01 Framing a decision as an answerable data question | 04 Building indicators that survive scrutiny |
| 02 Data quality, collection and where numbers originate | 05 Dashboards for management and board reporting |
| 03 Spreadsheet and reporting tool fundamentals | 06 Presenting findings without overclaiming |

ON COMPLETION, DELEGATES CAN

- ✓ Produce a monthly reporting pack unaided
- ✓ Judge whether a figure can be relied on
- ✓ Build and maintain a working dashboard
- ✓ Explain a trend to non-technical leadership

Exercises use your own operational data where data-sharing policy permits.

Cybersecurity Awareness

Practical security behaviour for institutions holding sensitive citizen and financial data.

AUDIENCE

All staff, with an extended track for privileged users

LEVEL

Foundation to Intermediate

FORMAT

Onsite · Amharic and English

MODULES

- | | |
|--|---|
| 01 The threat picture facing Ethiopian institutions | 04 Handling citizen and financial data correctly |
| 02 Phishing, impersonation and social engineering | 05 Device, mobile and remote working security |
| 03 Passwords, MFA and credential discipline | 06 Recognising and reporting an incident |

ON COMPLETION, DELEGATES CAN

- ✓ Identify and report a phishing attempt
- ✓ Apply credential and access discipline consistently
- ✓ Handle sensitive records according to policy
- ✓ Follow the incident reporting path without delay

Content is aligned to INSA guidance and, for financial institutions, to NBE expectations.

AI & Digital Transformation

Building leadership that can sponsor, govern and defend an AI and digital transformation programme.

AUDIENCE

Directors, department heads and executive sponsors

LEVEL

Advanced

FORMAT

Onsite · Executive off-site

MODULES

- | | |
|--|--|
| 01 Translating institutional mandate into an AI and digital roadmap | 04 AI literacy for non-technical leaders: what it can and cannot do |
| 02 Governance, risk and regulatory posture | 05 Sponsoring a programme that actually lands |
| 03 Budgeting, procurement and evaluating AI vendor claims | 06 Building and retaining technical staff in-country |

ON COMPLETION, DELEGATES CAN

- ✓ Defend an AI and digital roadmap to a board or ministry
- ✓ Evaluate vendor proposals critically
- ✓ Set governance proportionate to real risk
- ✓ Sponsor delivery with realistic milestones

Case work uses the delegate's own institution, so the output is a usable draft rather than an exercise.

Software & Systems Onboarding

Getting staff confident on the systems DES has deployed, before those systems become their responsibility.

AUDIENCE

End users, super-users and departmental champions

LEVEL

Role-based

FORMAT

Onsite, in parallel with deployment

MODULES

- | | |
|--|---|
| 01 Navigating the deployed system | 04 Approvals, workflow and internal control points |
| 02 Master data discipline and why it matters | 05 Reporting, extraction and reconciliation |
| 03 Day-to-day transaction and case processing | 06 Common errors and self-correction |

ON COMPLETION, DELEGATES CAN

- ✓ Process daily work unaided from go-live
- ✓ Maintain records to an agreed standard
- ✓ Run the reports the role requires
- ✓ Resolve routine errors without raising a ticket

Built against your live configuration, and delivered during stage four of the engagement rather than after handover.

Custom, by request

When the requirement does not match a standard track, we design the programme from scratch around it.

AUDIENCE

Scoped per engagement

LEVEL

Scoped per engagement

FORMAT

Onsite · Remote · Blended

HOW A BESPOKE PROGRAMME IS BUILT

- | | |
|--|---|
| 01 Requirement capture with sponsor and practitioners | 04 Bilingual materials in Amharic and English |
| 02 Learning objectives and assessment method agreed | 05 Pilot cohort, observation and documented revision |
| 03 Curriculum and materials developed to your context | 06 Delivery at scale or train-the-trainer handover |

ON COMPLETION, DELEGATES CAN

- ✓ A programme mapped to your actual skill gaps
- ✓ Materials in your terminology and both languages
- ✓ An assessment method agreed before build
- ✓ Internal trainers certified to repeat delivery

Ownership and reuse rights for commissioned materials are agreed in writing at contract.

Custom Training Development

When the requirement does not match a standard track, we build the programme from scratch — curriculum, materials, exercises and assessment — against your own systems, policies and regulatory obligations, in Amharic and English.

01

Capture

Workshops with the sponsor and the people doing the job, to establish what must change and how it will be measured.

02

Design

Learning objectives, module structure, exercise design and an assessment method agreed and signed off before build.

03

Build

Materials, workbooks, scenarios and trainer guides developed against your systems, terminology and policy set.

04

Pilot

A first cohort runs the programme, with observation and feedback feeding a documented revision.

05

Transfer

Delivered at scale, or handed to your own trainers through a train-the-trainer track.

Typical commissions

System-specific onboarding · Regulator-driven compliance training · Bespoke technical curricula · Induction and academy programmes

Train-the-trainer

We build the programme and certify your internal trainers to run it, so repeat delivery costs you nothing per cohort.

Materials ownership

Ownership and reuse rights for commissioned materials are agreed in writing at contract, not assumed afterwards.

04

Pathways & Tailoring

How the six tracks combine into role pathways, and how content adapts by sector.

Four pathways, built from the same six tracks.

Most institutions do not buy a single course. These are the combinations that come up most often, and the order we recommend running them in.

All staff

Baseline capability

03 Cybersecurity Awareness

05 Systems Onboarding

Technical teams

Run and maintain

01 IT & Systems Admin

03 Cybersecurity Awareness

05 Systems Onboarding

Managers & analysts

Decision capability

02 Data Analysis

05 Systems Onboarding

03 Cybersecurity Awareness

Leadership

Strategic capability

04 AI & Digital Transformation

02 Data Analysis

Pathways are indicative. Final sequencing is agreed after the needs conversation in stage one.

Same track, different room.

Scenarios, terminology, regulatory references and case work are rewritten for the sector in the room. A cybersecurity session for a bank is not the session a logistics operator receives.

Government

Public records, procurement rules, citizen service standards

Finance & Banking

NBE expectations, fraud typologies, customer data handling

Healthcare

Patient records, facility reporting, confidentiality practice

Education

Cohort-scale digital skills, institutional systems

Agriculture

Field data collection, registries, offline-first workflows

Enterprise & SME

Lean teams, generalist roles, cost-conscious sequencing

05

Running a Programme

From needs conversation to delegate assessment and the record you keep afterwards.

The same five stages as every DES engagement.

Training is not a separate product bolted on at the end. It follows the same structured sequence as the systems work, and in most engagements it runs inside it.

What you hold at the end.

Training is easy to buy and hard to evidence. Every programme closes with a documented pack you can put in front of an auditor, a ministry or a board.

Produced under our partner's ISO 9001:2015 certified quality management system, bilingually where the institution requires it for internal or regulatory filing.

Scoping note & objectives

The agreed statement of skill gaps and learning objectives the programme was built against.

Course materials

Delegate workbooks and reference guides in Amharic and English, yours to keep and reuse.

Attendance record

Per-cohort register suitable for HR, audit and donor reporting files.

Assessment results

Baseline and post-delivery measures showing capability change per delegate and per cohort.

Certificates of completion

Individual delegate certificates issued on successful completion.

Evaluation & next steps

Delegate feedback, trainer observations and a recommendation for the next cycle.

DIGITAL
ENTERPRISE
— SOLUTIONS —

Discuss your training needs.

Tell us which teams need to change, and what they should be able to do afterwards. We will return a scoped programme and a cost within one business day.
